Athey Wagon

Our Athey Wagon is one of the only Athey Wagons in Canada. It is designed to provide access and facilitate the manipulation of tools at the wellbore while providing the barrier of distance to our workers and equipment.

- Boom structure to provide extended reach into hazardous work areas
- Capacity to lift, drag, or move heavy loads out of or into hazardous work areas
- Integrated fire water system
- Maneuvered and operated by readily available excavation equipment such as a D-8 CAT or equivalent with a winch
